

The 50th anniversary celebration of the diplomatic establishment between Vietnam and Japan  
The 50th Year of ASEAN-Japan Friendship and Cooperation

- (1) “The 7th International Conference on Innovative Biology Medicine and Engineering ICIBME; The 3rd International Conference on Innovative Biology Medicine and Engineering ICIBME —in Vietnam,”
- (2) “The 3rd ASEAN Japan International Conference on Innovative Biology Medicine and Engineering ICIBME; The 2nd ASEAN Japan International Conference on Innovative Biology Medicine and Engineering ICIBME – in Vietnam”

## Prospectus

Medical · Environmental · Regenerative Research Organization MERRO is very pleased to announce opening the 50th anniversary celebration of the diplomatic establishment between Vietnam and Japan and the 50th year of ASEAN-Japan Friendship and Cooperation, “The 7th International Conference on Innovative Biology Medicine and Engineering ICIBME; The 3rd International Conference on Innovative Biology Medicine and Engineering ICIBME —in Vietnam , Vietnam-Japan” and “The 3rd ASEAN Japan International Conference on Innovative Biology Medicine and Engineering ICIBME; The 2nd ASEAN Japan International Conference on Innovative Biology Medicine and Engineering ICIBME – in Vietnam” with Hanoi Medical University.

Japan and Vietnam promote an alliance of medicine, science and technology with establishment of their network. We move forward tight connection on medical care and ASEAN countries with strengthening bilateral relationship.

The theme of this conference which will be held in the commemorative year of the 50<sup>th</sup> celebration of the diplomatic establishment between Vietnam and Japan and the 50<sup>th</sup> Year of ASEAN-Japan Friendship and Cooperation is “Vietnam-Japan Exchange in research activities in interdisciplinary fields of Science and Engineering-Medicine- Biology”.

It is needless to say that research activities in each field of science and engineering, medicine and dentistry, biology are extremely important and will have a great impact not only on the present but also on the future. However, research activities in the interdisciplinary fields of science and engineering, medicine, biology may produce unexpected synergies and synergetic effect, and it may lead to further new growth, new fields and the beginning of exploring the unknown. We believe that interdisciplinary fields have potential to greatly open up the future of human beings, living things and the universe.

We would be very pleased if we could contribute to the saving lives and enhancing health in Vietnam, Japan, ASEAN countries, Asia, Middle East and the world by exploring the interdisciplinary fields together with the people of Vietnam.

The international conference involves globally significant scientific experts and physicians in fields of medicine, science and technology at a conference hall. Through this conference, we strongly hope that we can contribute to early detection, early therapy and enhancement of health maintenance. Especially, regenerative medicine which utilizes natural healing power that is inherent in all human beings, animals and plants in the natural world will be placed at the center of the conference. Regenerative therapy is one of the most cutting edge medical technologies that realizes regenerative medicine by regaining the vitality of the cells and tissues after creating the physiochemical and biological environment surrounding cells and enhancing natural healing power.

The WHO indicates a current statistics of the top 10 causes of death that ranks heart ischemic disease, brain stroke, lower respiratory infections and cancer.

In a base of therapies for cancer ranked at high positions of causes of death in Vietnam and Asian countries and regenerative medicine, the experts and physicians participate robust clarification of current issues and future perspective, and they share medical knowledge and tasks of innovative medical science and therapies in Vietnam, which include regenerative medicine in clinical considering

throughout the world.

Furthermore, as we hope to deepen the friendly relations with ASEAN countries, the conference jointly holds “The 3rd ASEAN Japan International Conference on Innovative Biology Medicine and Engineering ICIBME; The 2nd ASEAN Japan International Conference on Innovative Biology Medicine and Engineering ICIBME – in Vietnam”.

Human beings cannot escape from death, but everyone wants to have healthy and happy days while they are alive. Prevention of health is various diseases, trauma and aging. Regenerative medicine which we pursue has the high potentiality to overcome these problems without adverse effects.

<http://www.hmu.edu.vn> Research Organization MERRO Group in Japan to our regenerative medicine, centered to innovative medicine, with the target of medical care for ageless society through this conference. Once again, we would like to express our sincere gratitude to all the professors and those who have contributed to this academic conference “The 7th International Conference on Innovative Biology Medicine and Engineering ICIBME; The 3rd International Conference on Innovative Biology Medicine and Engineering ICIBME –in Vietnam , Vietnam-Japan” “The 3rd ASEAN Japan International Conference on Innovative Biology Medicine and Engineering ICIBME; The 2nd ASEAN Japan International Conference on Innovative Biology Medicine and Engineering ICIBME – in Vietnam”. Our goal is that Vietnam will become a leading country on medicine in ASEAN with establishments of innovative system at medical centers.

Date: Friday, 24 November 2023

Venue: Hanoi Medical University

Distinguished Guest: His Excellency Mr. Takio Yamada,  
Ambassador Extraordinary and Plenipotentiary of Japan to  
Vietnam

Organizer: Medical Environmental Regenerative Research Organization MERRO Group  
General Incorporated Association Medical Environmental Regenerative  
Research Organization MERRO  
Hanoi Medical University

Supporter: Embassy of Japan in Vietnam

Chairpersons, Japan: Ms. Atsuko Matsuoka,  
President, MERRO  
Professor Yasuhiko Tabata,  
Director of MERRO · Professor of Kyoto University

Chairman, Vietnam: Professor Ta Thanh Van  
Chair of Board of Trustee, Hanoi Medical University

Co-organizer: MERRO Foundation  
NPO International Club
