

The 50th anniversary celebration of the diplomatic establishment between Japan and Vietnam The 2nd Japan-Vietnam Medical·Science·Engineering·Pharmaceutical International Students Exchange

Medical Environmental Regenerative Research Organization (MERRO) welcomes its 14th anniversary. As a think tank for the world's most cutting-edge science and technology, MERRO Group have been working on various projects to contribute creating safer and more secure world through medicine-science-engineering collaboration, industry-government-academia collaboration, industry creation, educational cooperation Vietnam/ASEAN collaboration and becoming a bridge between Japan and the world.

To commemorate the 50th anniversary of the diplomatic establishment between Vietnam and Japan, we would like to hold the 2nd Japan Vietnam medical, science, engineering, pharmaceutical student exchange event where renowned doctors/researchers who are leading the way in medical care at the forefront of The Socialist Republic of Vietnam after studying in Japan and distinguished doctors/researchers who actively engage in research activities at Japanese universities. Also, MERRO provides Scholarship to Hanoi Medical University students in the Socialist Republic of Vietnam.

Five years have passed since the first Japan-Vietnam medical student exchange event was held in 2018 to commemorate the 45th anniversary of Japan-Vietnam diplomatic relations. The friendly relationship between Vietnam and Japan, cooperation and collaboration in the fields of medicine and science are further deepening, and the progress in the medical field is remarkable. We at MERRO are further deepening our friendship and cooperative relationship with the people of Vietnam through academic conferences, conclusion of cooperation agreements, scholarships, etc. As the coronavirus pandemic subsides, changes have occurred in the academic world.

Under these circumstances, we at MERRO believe it is important to continue to work even harder towards a better world and the spread of medical care. Researchers who have studied in Japan and very active in their home country Vietnam after return from Japan making the most of their experience of studying in Japan will gather at this event. We would be more than happy if this event would be able to help deepening of exchanges among them, their further success, building/strengthening network towards more deepening of friendship between Japan and Vietnam, and be of help for evolving further better Japan-Vietnam relations and realizing a better world together with Vietnamese researchers.

We sincerely hope that this event will be able to help further the friendship between Japan and Vietnam, as well as the further development of medicine and science in both countries. Thank you very much for your cooperation.
